## IMPORTANT NOTIFICATION

International application No.

PCT/US04/37106

International filing date (day/month/year)

05 November 2004 (05.11.2004)

Priority date (day/month/year)

07 November 2003 (07.11.2003)

Applicant

BUNN-O-MATIC CORPORATION

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the *PCT Applicant's Guide*.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed invention is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.  
PCT/US04/37106**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

## 1. Statement

Novelty (N)	Claims <u>2, 4-8, 10</u>	YES
	Claims <u>1, 3, 9, 11, 12</u>	NO
Inventive Step (IS)	Claims <u>2, 6, 7, 10</u>	YES
	Claims <u>1, 3-5, 8, 9, 11, 12</u>	NO
Industrial Applicability (IA)	Claims <u>1-12</u>	YES
	Claims <u>NONE</u>	NO

## 2. Citations and Explanations (Rule 70.7)

Claims 1, 3, 9, 11 and 12 lack novelty under PCT Article 33(2) as being anticipated by Patel.

There is disclosed in Patel a beverage making apparatus, comprising: a controller 59; a controllable water source (water main); a water dispensing line 32 communicating with the water source; a flow meter 33 communicating with the water dispensing line and coupled to the controller for monitoring the volume of water flowing through the water dispensing line; a controllable heated water reservoir 30 communicating with the water dispensing line and coupled to the controller; a spray head 28 communicating with the heated water reservoir; a volume adjustment assembly 38a, 38b coupled to the controller.

Claims 4, 5 and 8 lack an inventive step under PCT Article 33(3) as being obvious over Patel in view of Mercier et al. Mercier discloses that it is known in the art to have as the water source a water reservoir 46 which feeds a heated water reservoir. I would have been obvious to one skilled in the art to substitute the water main of Patel with the water reservoir disclosed in Mercier, in order to provide an alternative means for feeding the heated water.

Claims 2, 6, 7 and 10 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the claimed subject matter.
